SOCIAL RESPONSIBILITY REPORT
AS ON MARCH 31st 2013**

FEDERAL BANK
YOUR PERFECT BANKING PARTNER

COMMUNITY INVESTMENT AND SOCIAL RESPONSIBILITIES

For federal Bank, Corporate Social Responsibility (CSR) has been an inherited & inbuilt element of its fundamentals right from the day the bank was founded...

Our founder's values & ethos based on trust got embedded in the bank's policies & principles which reflect on its day to day business. CSR in Federal Bank began with the first act of cultivating banking habits in an agrarian society to effectively utilize idle money for productive purposes. Creating employment opportunity for a predominantly farming community was phase two.

Federal Bank's early training cum employment policy of recruiting academically brilliant students who passed out school final examination in first class, but financially unable to proceed to higher education was an early commitment to its society. This enabled large number of poor but brilliant students to develop their personality and to grow to adorn very important positions in the society.

The Bank is a commercial entity. It has to carry out its operations to generate profits to fulfill its responsibility to all stakeholders. But its activities are carried out in the society and it owes to the society for whatever functions it carries out. While carrying its activities, Bank is duty bound to ensure that its products and services are not detrimental to the interests of the society. Bank has approved a policy for **Sustainable Development**, which ensures that Bank's activities are conducive for sustainable social development. In addition to this, Bank has to directly participate in social activities to help development of specific areas/segments.

This policy is on bank's direct involvement in social welfare projects.

CSR is a very wide term covering a very vast area. Bank would not be able to effectively implement its CSR activities in all areas covering all geographies. So the policy has to prescribe the areas and the geographies that the Bank would focus and also the model of its implementation.

Vision

The Bank encompass Triple Bottom Line approach (social dimensional features, economic features and environmental features) in its operations The Bank will adopt more green options and implement more sustainability practices in its pursuit of Sustainable Social Development will reevaluate usage of paper, will go for green buildings, will ensure efficient usage and prevent wastage of power, water etc. The Bank would strive to earn carbon credits.
